

Identification and characterization of expression-derived PCD molecular subtypes

Consensus clustering of the 47-gene candidate PCD expression landscape in TCGA-LUAD and TCGA-LUSC

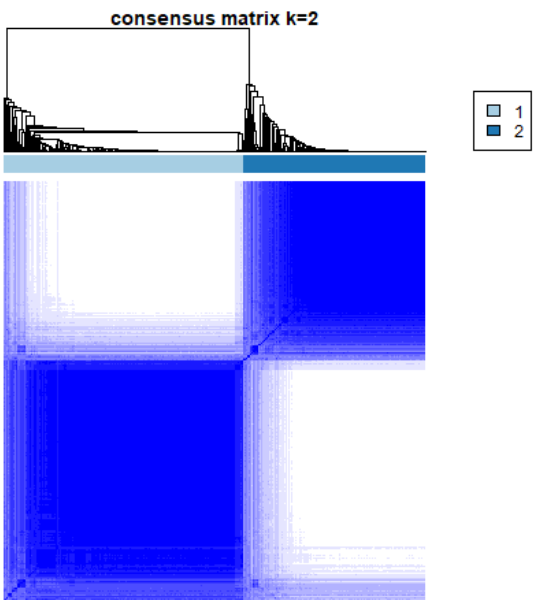

A TCGA-LUAD consensus clustering

Consensus matrix at k = 2

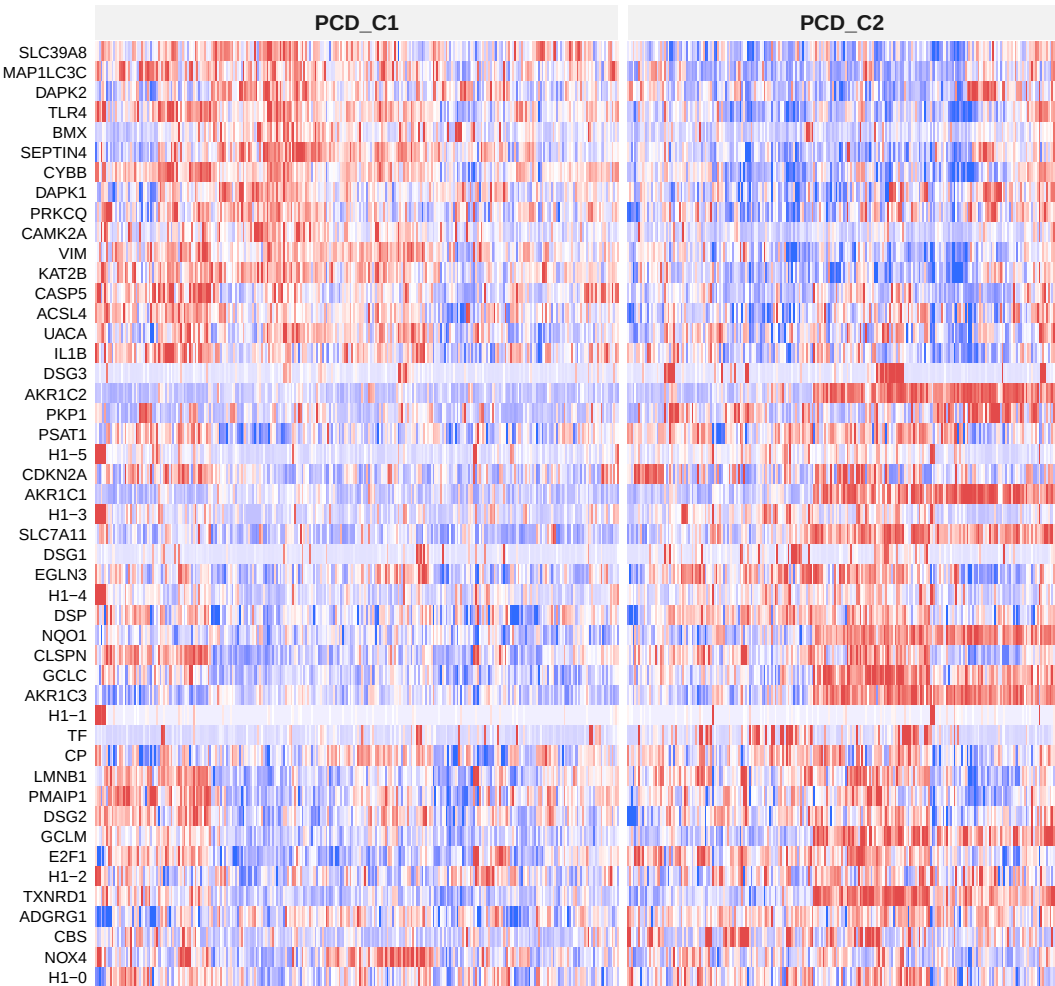

B TCGA-LUSC consensus clustering

Consensus matrix at k = 2

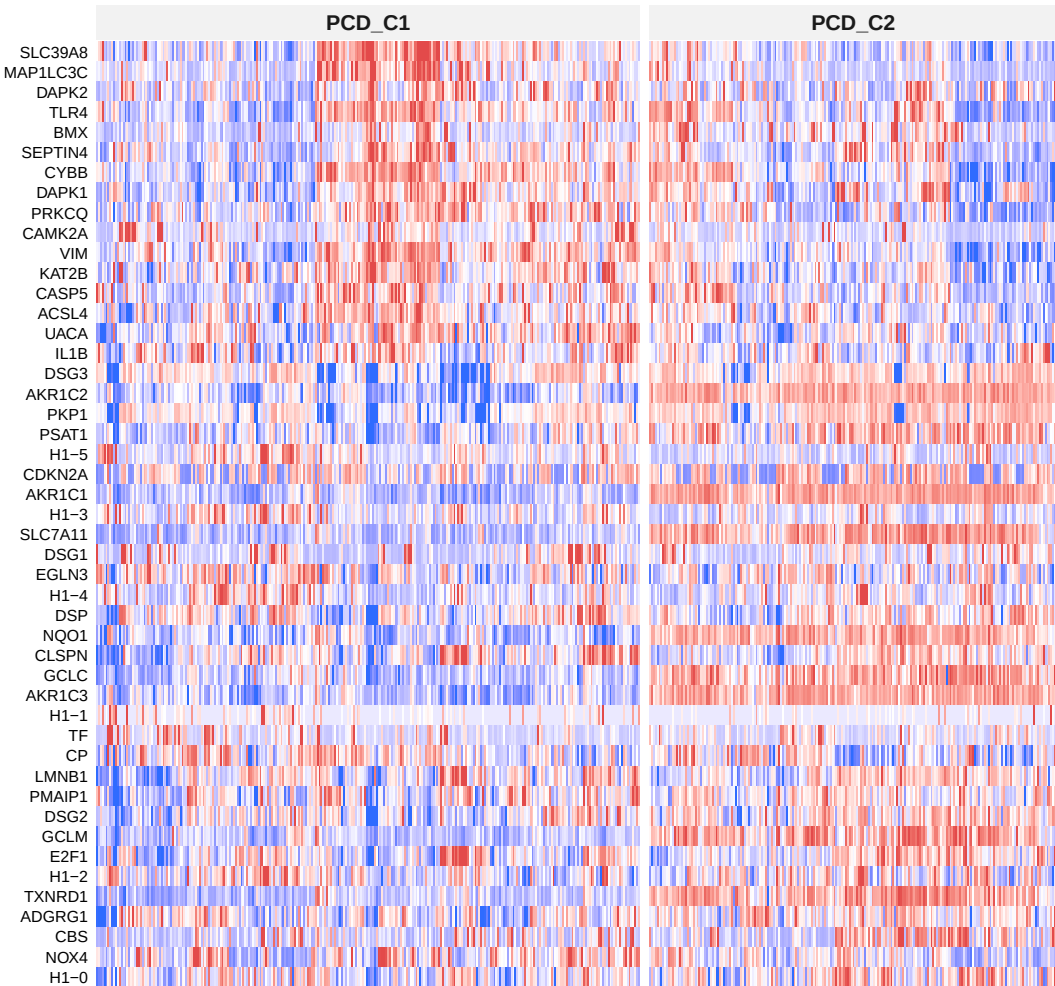

C TCGA-LUAD PCD expression pattern

47 candidate PCD genes; primary tumour samples

D TCGA-LUSC PCD expression pattern

47 candidate PCD genes; primary tumour samples

E PCD-mechanism differences between molecular subtypes

Difference = PCD_C2 – PCD_C1; filled symbols indicate FDR < 0.05
