

A Repeated nested-CV performance

LUAD mean C = 0.604; LUSC mean C = 0.505

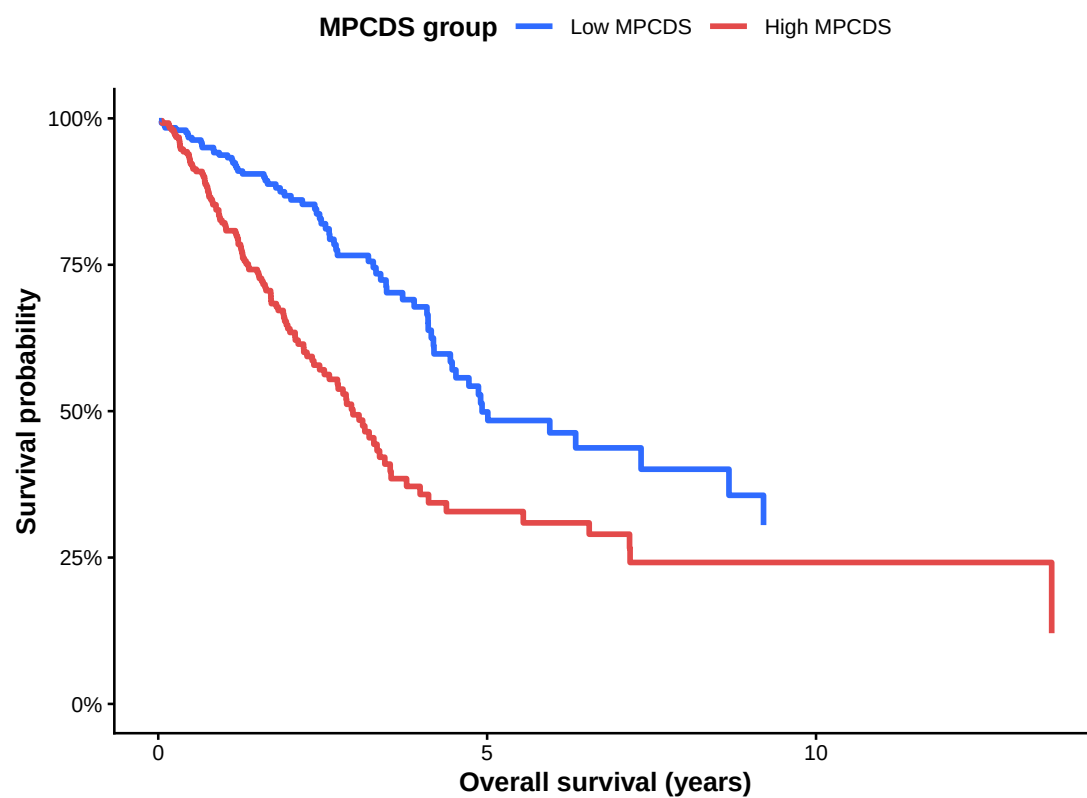

B Final LUAD ridge coefficients

Top 20 absolute coefficients shown; final model contains all 47 PCD genes

C TCGA-LUAD survival by MPCDS

Development-cohort median split; log-rank p = 1.8e-07

D Incremental prognostic performance

18/20 repeats improved; mean delta C = 0.011
